

CASE STUDY

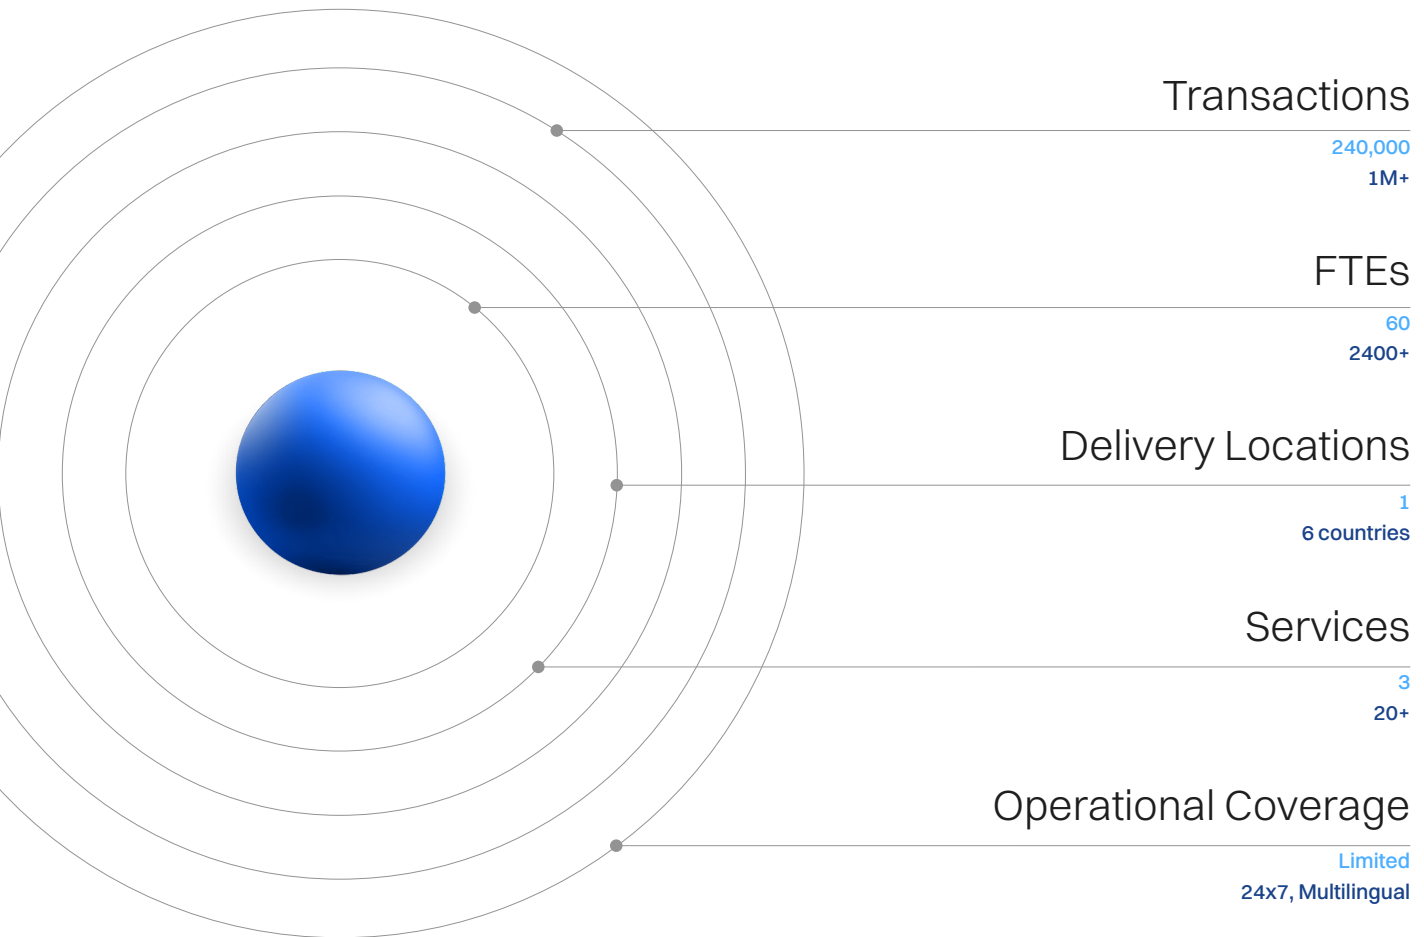

## 20+ Years of Trusted Partnership with a Leading Airline Delivering Assured Outcomes

# Executive Summary

A leading global airline partnered with Atain to continuously evolve its operations from fragmented, process-heavy environments into a unified, orchestration-led model. This long-standing relationship has scaled with the airline's business, enabling predictable, measurable outcomes across global operations and supporting 1M+ transactions with consistent efficiency, CX excellence, and multi-channel support.

## Scale and Growth Metrics

This growth was achieved while maintaining control, consistency, and performance across all dimensions.

● Performance Metric    ● Initial State    ● Current State

# Business Challenges

## Workflow Architecture

Operational fragmentation across workflows and functions

## Operational Load

Demand volatility impacting turnaround times and service consistency

## Execution Model

High manual dependency leading to inefficiencies and errors

## Global Footprint

Lack of unified visibility and control across global operations

## Solution: Orchestration-Led Operating Model

Atain implemented an integrated operating model centered on outcome ownership, workflow orchestration, and dynamic scalability. People, processes, and automation were unified into a single system to eliminate variability, improve decision velocity, and ensure consistent execution across channels and geographies.

## Key Transformation Levers

- 01 Workflow standardization and integration
- 02 Multi-skilled workforce model
- 03 Automation to reduce manual intervention
- 04 Data-driven performance management
- 05 Agile frameworks for demand responsiveness

# Business Outcomes

## Higher Efficiency

Improved turnaround times and operational efficiency

## Enhanced Customer Experience

Consistent and enhanced customer experience

## Greater Scalability

Seamless scalability across geographies and services

## Stronger Operational Resilience

Operational resilience during disruptions (including COVID-19)

## Lower Costs

Reduced costs through optimized workflows and automation

# Driving Assured Outcomes Through Intelligent Orchestration

Built on a 20+ year partnership, this transformation demonstrates how sustained collaboration, deep operational knowledge, and intelligent orchestration can deliver assured outcomes at scale. It enables predictable performance, faster execution, and lasting business impact.

Atain is an enterprise orchestration partner that brings people, processes, and platforms into sync with AI to redefine the future of work. By orchestrating expertise, Atain accelerates velocity to eliminate variability and deliver assured outcomes.
